

Dear Mr. Anderson,

I think you will like my well thought out ideas for our county. You will find that they will suit the wants of the majority of the people in our county.

My first idea is that we might could put a bowling alley/laser tag building in Stanton. This could be a place to suit everyone. This is because the majority of people love to bowl. Many different families would go and bowl. We could maybe even have a bowling championship. We could have many different teams to bowl against each other for a prize such as a trophy and a small check. We also could maybe have laser tag in one small section of the building. This would also be an attraction because lots and lots of people love laser tag. WE could also make a lot of money off of it. For say, we could charge \$3 per person and have 30 people there. That would be \$90 in one hour or two just for that one purpose.

If we put a theatre in Stanton then they wouldn't have to go other places. We could also have teens working at the theatre too. This could also help stop drugs in Powell County. A theatre could be a real money maker. Unlike the drive-in theatre, we could have at least 5 movies playing at once. This would attract more people and gain more funds for Powell County.

These are the ideas that I think would really help solve most of Powell County's problems. We could maybe even start expanding Powell County soon if we go with these ideas. Wouldn't you love to see Powell County get farther back on track. These ideas could maybe be everlasting throughout Powell County.

Sincerely,

Dillon Barker
